WORK EXPERIENCE

Go Backend Developer | Sep 2024 - Present

Fairfleet (contracted via Inoxoft, later transitioned to direct employment)

- Used tech stack: Go, NATS, AWS (Lambda, S3, EKS, etc.), Docker, Kubernetes, Loki stack (Promtail, Loki, Grafana), Terraform, Helm, MariaDB, MongoDB, REST, ws, gRPC, Drone CI/CD
- Responsibilities: development, debugging, designing solution architectures, maintenance of documentation, unit testing, finding optimised solution, profiling

Go Backend Developer | Dec 2023 - Aug 2024

Self-employment

- Used tech stack: Go, AWS (Lambda, S3 etc.), Docker, Kubernetes, MongoDB, REST, ws, gRPC
- Working on telegram bot

Go Backend Developer | Feb 2021 - Dec 2023

Yalantis

- Used tech stack: Go, JavaScript, Kafka, AWS (Lambda, RDS, S3, SQS, SNS, SES, EKS, CloudFormation, etc.), Docker, Kubernetes, ELK stack (Elasticsearch, Logstash, Kibana), Loki stack (Promtail, Loki, Grafana), PostgreSQL, DynamoDB, TimescaleDB, Cassandra, Redis, REST, ws, gRPC, Git, Github Actions, Gitlab CI/CD, Jenkins
- Involvement in 5 different projects during the period of cooperation (IoT, HRM, Payroll Management, Web-Socket Based Chat System with monolith/microservices architectures)
- Responsibilities: development, troubleshooting, designing solution architectures, maintenance of documentation, unit/integration testing, customers support, parsing of web sites

Python Backend Developer | Jul 2020 - May 2021

Hard.Soft + Freelance

- Used tech stack: Python, PostgreSQL, MySQL, Redis, GCP, Heroku, Docker, Git
- Involvement in several MVPs (Streaming Platform, Sports Betting System, Social Media Platforms with monolith architectures)
- Responsibilities: development, unit testing, designing solution architectures

ACHIVEMENTS

- AWS Certifications (Architect/Developer Associate)
- Passed Ardan Labs self-paced training (Go, Docker, Kubernetes bundle 120+ hours)
- Many successful system optimizations have improved user experience and reduced costs
